Abstract

The research study on the Community Profile and Needs Assessment of one of La Consolacion University's adopted communities- the Northville 9 located at Iba O'Este Calumpit, Bulacan sought to develop a greater understanding of who the community is-its sociodemographic characteristics, economic structures, local institutions, economic activities and livelihoods, basic household, health concerns, social and religious organizations. Through the profiling data and needs assessment, the study would provide an entry point and basis for the Community Engagement Plan (CEP) of the LCUP's Community Extension Services Program. Identifying the needs of the community is an utmost requirement for the LCUP Community Extension Services to produce the CEP.

Keywords: *community profile, needs assessment, extension services, communities*
